Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 1 and 10 are allowable because the prior art of record fails to disclose or suggest or teach the recited collision force detection means for detecting a collision force of refrigerant flowing in the refrigerant circulation circuit to produce a collision force detection value, and discharge capacity control means for controlling a discharge capacity of the variable capacity compressor by referring to the collision force detection value (see claim 1); collision plate subjected to collision with a refrigerant flowing in the refrigerant circulation circuit, and a valve portion adapted to introduce discharged gas into a crank chamber, the valve portion provided to a rod through which an electromagnetic force is exerted to the collision plate, wherein when a force exerted to the collision plate by the collision with the refrigerant is greater than the electromagnetic force, the valve portion is opened to control a discharge capacity of the variable capacity compressor such that the force exerted to the collision plate approaches the electromagnetic force (see claim 10).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohammad Ali whose telephone number is 703-308-5032. The examiner can normally be reached on Monday to Friday.
